TITLE : VINYL CHLORIDE-BASED RESIN  
COMPOSITION

ABSTRACT : PURPOSE: To obtain the subject composition, containing a mixed product of a zinc compound with a piperidyl group-containing compound and a phosphoric acid compound in a vinyl chloride-based resin and excellent in water whitening, weather and heat resistances without causing zinc burn and coloring.

CONSTITUTION: The objective composition containing (B) 0.1-5 pts.wt. zinc compound (e.g. a 1-22C aliphatic carboxylate) and (C) 0.01-5 pts.wt. product obtained by mixing (I) a compound [e.g. a compound expressed by the formula (R<sub>1</sub> is H, 1-4C alkyl, 2-4C hydroxyalkyl or 2-4C acyl; R<sub>2</sub> and R<sub>3</sub> may form alkyleneedioxy group each substituted with a monofunctional organic group such as acyloxy group or substituted amino group)] having at least one piperidyl group with (II) one of at least phosphonic acid, an organic phosphoric acid ester, phosphorous acid and an organic phosphorous acid ester and/or an organotin compound in (A) 100 pts.wt. vinyl chloride-based resin.
